TO: Blaine Bataud Mike Bellotti; Olin Chemical Corp.	FROM: Jim Mullins EPA GAW-SE	DATE 10/16/84
		TIME 10:00 AM
SUBJECT <u>Olin - North Little Rock Site - 10/16/84 Sampling of New Olin Wells</u>		
SUMMARY OF COMMUNICATION <p>I Met the Olin representatives and the FIT on site to observe the sampling effort. Messrs Bellotti & Bataud inquired of EPA's intentions relative to the site. I informed them that we were conducting an endangerment assessment, and upon receipt would rank the site for possible inclusion on the NPL. They stated that Olin would like to avoid the NPL listing and wondered how EPA might regard an aggressive Olin closure action (with EPA approval) I told them that I did not know, but that EPA approval of such a plan would be mandatory, and it would be wise to approach EPA officials in a decision making position (Nott/Hetherway/Davis). I further informed them that EPA would insist on oversight in any such activity. We discussed the problems at the site that must be addressed— pesticides leaving site via surface and groundwater, buried pesticides, contaminated soil, etc. Bellotti and Bataud agreed to discuss the matter further with other Olin officials.</p>
